Subject: Stop this
Date: Saturday, August 13, 2011 7:25:27 PM

Stop making good people complicit in your culture of death. Pregnancy is a blessing and not a disease. The choice to chemically alter ones body to prevent normal reproductive operation is no different than the use of chemicals to alter ones body to seek pleasure in alcohol or drug abuse. We know that impact that these abuses on society. NARAL, Planned Parenthood and the Pharmaceutical Companies are driving this and they don't care about the impact on Society.

This is a travesty.
